REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The instant claims are novel and unobvious over the prior art of record. The requirement in the compound of the formula I that the substituent R^3 on the phospholane phosphorus atom and the substituent on the C2 atom of the phospholane ring are in *cis* relation to each other taken together with unexpected results in the percent of optical purity in asymmetrical hydrogenations shown in Tables A-E, where transition metal catalysts containing the *cis* ligand of the formula I are compared to transition metal catalysts containing the *trans* ligand of the formula I, makes the instant claims unobvious and novel. JP 2002-69086 and US 2003/0144137 disclose the *trans* isomer of the formula I where $R^1=R^2=R^3=Ph$ and $R^4=R^4'=R^5=R^6=H$. This compound is the (1R,2S)-*trans*-PMP5 ligand in Tables A-E.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
